

smart sleeve back brace

far infrared & energetically enhanced joint support

Description

The GIA Smart Sleeve Back brace is designed to fit and support your back without easily slipping off. The highly elastic fabric with Far Infrared fiber combined with GIA's proprietary blend of Energy Resonance Technology (ERT) features three dimensional knit technology and soft edge compression. The sleeve is breathable, comfortable and designed to decrease levels of discomfort, normalize potential swelling, increase activity and ultimately help improve your quality of life.

Benefits

- Energetically optimized with ERT
- Made with Far-Infrared fiber which revolutionizes the way biofield-reinforcing frequencies are utilized by the body's energy field
- Revolutionary knitting process offers superior ergonomics and breathability
- Unique three-dimensional compression offers optimal joint support during low, medium, and high-intensity activity

Available In

- Small, Medium, Large, X-Large, XX-Large
- *See Smart Sleeve Measurements Chart

Technology Used

- Energy Resonance Technology (ERT)

How to Use

- Wrap back brace around waist
- Connect both ends of sleeve with Velcro
- Adhere adjustable straps to sleeve with Velcro

Product Highlights

- Far Infrared Yarn
- Flex & Comfort
- Compression & Support
- Powered by ERT
